

Are you looking for a truly international first job opportunity? **Build the Future is the answer!**

What Build the future is?

Build the future is the Prysmian Group Graduate Program that provides an immersive experience in our company from day 1.

The program starts with a two-week Global Induction in our HQ in Milan with trainings and activities led by the Prysmian Group Academy in collaboration with a Top-Ranking Business School. During the first weeks of your journey, you also start our mentorship program. *Great, right?* Your learning experience does not stop here!

Following your induction, you will be part of a 1 year job rotation in 3 different departments: Research and Development, Operations in one of our production sites, and Commercial. After the first year of rotation, you will start your international assignment for a duration ranging from 2 to 3 years.

Are you ready? The international assignment is a great experience to learn new ways of working, acquiring new knowledge, meeting new colleagues and embracing a new culture. At the end of your assignment abroad, you will be ready to take a new responsibility in the technical or business areas continuing your career in Prysmian Group.

Who are you?

- You are keen on joining a career in our industry and you are ready to embrace a new challenge.
- You have graduated in the last 18 months or you are completing a degree in the Engineering, Technical or Business and Economics fields.
- We are a global company. Being fluent in English is key.
- You have worked or studied abroad and you are willing to join another international experience with Prysmian Group.
- We have global teams and we are present in 50+ countries. Having excellent communication and presentation skills is key.
- You love learning and working with other colleagues.
